Experiment -1

AIM: To create an AWS free tier account to provision the resources.

Description:

Amazon Web Services (AWS) is a cloud computing platform that provides on-demand services such as computing, storage, databases and networking through the internet. The AWS Free Tier allows users to explore eligible services within specified free usage limits. Charges may apply if the limits are exceeded or paid resources are used. The AWS Management Console is used to access and manage these cloud services.

Steps:

1. Open https://aws.amazon.com/ and select “Create an AWS Account”.
2. Enter an email address and account name, verify the email, and create a password.
3. Provide the required contact details and complete the phone and payment verification steps.
4. Select the available support plan and sign in to the AWS Management Console.
5. Use the Region selector at the top-right to choose a region. In the given output, Europe (Stockholm) is selected and Asia Pacific (Hyderabad) is being enabled.
6. On Console Home, explore services such as EC2, S3, CloudWatch and IAM.

Output:
